

*Deadhead a vessel
and find a grain*

*Deadhead a colour
and find an age*

*Deadhead a harness
and find a snare*

*Deadhead a valley
and find a beer*

*Deadhead a beginning
and find a part of your head*

*Deadhead a fastener
and find a part of your face*

*Deadhead a male deer
and find a playground game*

*Deadhead a barn
and find a piece of furniture*

*Deadhead a journey
and find a fault*

*Deadhead a part of a wave
and find a nap*

*Deadhead a washbasin
and find a liquid*

*Deadhead a beginning
and find a dessert*

*Deadhead a notch
and find the middle*

*Deadhead a fruit
and find a variety*

Can you solve these riddles? (They were all written by students, based on the work of Czechoslovakian poet Miroslav Holub)

Here are some clues: to deadhead a word means to remove the first letter of that word.

For example, if you deadhead the word *strap* like this, *s/strap*, you are left with the word *trap*.

Here's how a Deadheading for this could look like:

Deadhead a **harness** (another word for a *strap*)
and find a **snare** (another word for a *trap*)

Can you solve the rest now?
